Slöjd och hantverk – form och kultur specialisation Blacksmithing

An education in blacksmithing with a focus in tool-making and art-forging, during which you learn the whole process from manufacturing charcoal, producing iron from bog and to creating your own products using traditional techniques. You are also given the opportunity to specialize and practice your hand skills through product development and production. Each academic year ends with an individual project work. You can choose to study one, two or three years. If you choose to study three years, you can choose to either apply for a journeyman diploma or do a final project.

Head teachers

Anders Almlöf & Per Alnaeus

Extent

Full-time

Length

1 - 3 years

Apply by 15th of April

Slöjd och hantverk – form och kultur specialisation Sewing

You will learn the entire sewing process from material, sketching, design and pattern making to toilein testing and adjustment as well as sewing your own garments. Take inspiration and knowledge from older folk tradition as well as modern designs. You get to sew by hand and study folk costumes, as well as learn machine sewing and pattern construction. In the programme you will also learn dyeing, embroidery, shape and function, craft and cultural history and advanced sewing techniques. Based on these skills, you will work independently and develop your own design language. You can choose to study one, two or three years. Each academic year ends with an individual project work.

Slöjd och hantverk – form och kultur specialisation Wood

Join the process from the growing tree to the finished product. The programme aims to teach you how to master the techniques and give wooden objects a functional and personal shape through a unique craft tradition. You will get knowledge of the Nordic wood types and get to work with fresh, newly-cut trees as well as dried wood. You learn to master the tools and different techniques to be able to work independently with your own design language. Furniture and tool manufacturing, coloring and molding, carving and basket manufacturing are examples of things you can learn during the programme. Each academic year ends with an individual project work. You can choose to study one, two or three years. If you choose to study three years, you can choose to either apply for a journeyman diploma or a do a final project work.

Sätergläntan - Institute of crafts

We offer you knowledge that shapes the future. The starting point in our educations and courses is to always work sustainably and to let nature be the base in both material and method. This is a thought that permeates our entire organization from our store to our restaurant. Sätergläntan arranges programmes and courses in crafts and sloyd techniques on site in Insjön as well as online courses with on site meetings for both professionals and leisure hobbyists.

Sätergläntan is located in Insjön, Dalarna, in an environment that invites creativity and the joy of creating. The year-round courses are eligible for study grants and all programs are under state supervision by the Swedish National Agency for Higher Vocational Education. Sätergläntan is a business association that started on the initiative of the National Association of Swedish Handicraft Societies - SHR, Leksand municipality and the country's handicraft associations.

The Arts and Culture education programme 1 – 3 years *Slöjd och hantverk – form och kultur*

Slöjd och hantverk – form och kultur is an art and cultural education programme for those who want to learn crafts and sloyd from scratch. We have four specialisations : blacksmithing, sewing, wood and weaving. The education programme is between 1 and 3 years and during the programme you will gain practical, theoretical and historical knowledge in both traditional and modern craft and sloyd techniques, as well as insights in ecology, economics and environmental issues. During your time at Sätergläntan you will cooperate across focus areas with students from other specialisations. We also give you knowledge in entrepreneurship and product development for those who want to learn how to conduct your own business.
